Single Side

SunLight K3, get recognized

In today's world, there is hardly any anything, be it work or leisure, where plastic cards do not play an essential role. Whatever the application is, the SunLight K3 printer is the ideal choice every time. The SunLight K3 Single and Dual versions offer amazingly clear and vivid color printing!

Two Models: Single and Dual

SunLight K3 Single

Personalizing your cards could not be simpler than with this all-in-one photo, text and barcode color or black and white card printer designed to print your cards one side at the time.

SunLight K3 Dual

If it is a heavy-duty, front and back, one pass card printer you need, then the SunLight K3 also comes in the Dual version that is sure to satisfy even the most demanding card printing requirements.

Single or Dual, here are the advantages

Thanks to their advanced technology, both versions are extremely easy and safe to use.

Ribbons, cleaning, software

Say enough to all the frustration that goes with high-tech! As advanced as they may be, both SunLight K3 models incorporate simple features designed to maximize user friendliness and reliability!

EasyLoad: the card printing ribbon and cleaning roller have been incorporated into a single cartridge for trouble free operation. Installing the cartridge is now as easy as ever, and there is no need to clean the rollers, as they get changed every time the cartridge is replaced. This eliminates broken ribbons and makes ribbon changes faster and more efficient thus maximizing productivity.

Software: the printer comes bundled with the free "Rainbow Light" software for easy card layout and color management. The NEW "Rainbow Smart" will complete the software package for managing all Smart Cards applications.

Driver: the driver supplied with the SunLight K3 comes with time and money saving functions such as: print diagnostic for identifying and correcting errors; ribbon running out warning, so that replacement supplies can be ordered promptly.

Dual Side

Color ribbon panel saving function

The SunLight K3 detects each color ribbon panel so that there is no ribbon wastage when powering on the printer.

Smile! One high quality photo coming up!

The Sunlight K3 is a high-resolution printer with 16.7 million Microsoft-certified colors and amazing photo, graphic, text and barcode printing capacity. Crisp and clear images are guaranteed every time.

Access? Smart Cards? All under control

The SunLight K3 is not only easy to use, but is the only printer in the category to feature upgradable Smart's Cards encoding options: contact, contactless and proximity. Thanks to a sophisticated technology, it provides maximum flexibility and security.

And for the future? Upgrade

It is hard to predict future corporate requirements, but when it comes to card printing, the SunLight K3

is set to cater to them. You can be assured that the SunLight K3 is capable of evolving along with your business, and manages any additional features you may require in the future.

Warranty

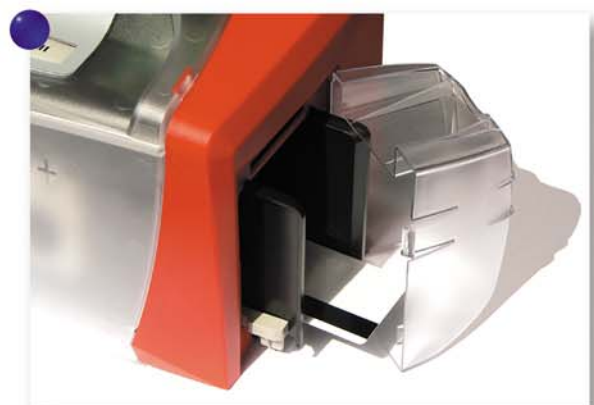

You are covered by an industry leading two years warranty on the printer and the printhead, even though it is unlikely you'll ever need the warranty!

Sales kit

Open the kit and turn on the color! The red cover is the SunLight K3's visiting card and the printer cannot wait to put color into your business, too.

Inside the box you will find:

- the SunLight K3 printer
- a CD Rom with the Rainbow Light software or Rainbow Smart with USB key and multilingual User Manual;
- a CD Rom with the printer driver;
- a Service Card and a Warranty Letter;
- power and USB cables.
