

Passport Photo Printing System

The Image Sales Passport Printing System can be purchased in whole or in parts depending upon your needs. As a system it has everything you need to produce passport and immigration sized photos. Additionally, it has the capability of 25 other photo formats one of which is displayed above. The cost saving over Polaroid film is substantial and the media is not prone to fluctuate due to temperature changes as Polaroid film does.

HiTi Photo Printer S-420

Offers Passport & Photo processing

The HiTi S-420 is the only photo printer compatible with every digital camera on the market today. With 20 plus sizes available it is the ideal choice for processing Passport Photos as well as smaller ID photo's. The HiTi S-420 prints photo's in a matter of seconds and has no known limitation on digital camera compatibility.

Features

Wizard Window LCD

HiTi S-420 enables total control over photo printing without a computer by using the wizard window color LCD controller. The key functions include...

- the choice of printing formats. Choose between printing passport photo's, stickers (4/2/4, 4 x 4 and 1 x 1) and ID photo's.
- quick image editing and enhancement capabilities. Adjust color, contrast, brightness, rotate, resize and move images through the edit function on the wizard window.
- pre-set color settings to suit your specific camera. This function allows users to customize the ideal color printout settings according to the digital camera used.
- the ability preview images on the memory card.

Twin Slots Multi Memory Card Reader

The S-420 accepts 7 different types of memory cards, including...

- Memory Stick (MS)
- Memory Stick Pro (MS Pro)
- Compact Flash type I & II (CF)
- Secure Digital (SD)
- SDHC
- Multimedia Card (MMC)
- Micro Drive

Protective Overcoating Technology

Protective overcoating technology provides a protective layer over photo's providing water proofing and UV radiation protection.

Camera Specifications
